## Internship

April 2025 – July 2025

### IT Training – Lincoln College of Science, Management & Technology

Apr 2025 – Jul 2025

- Completed hands-on training focused on building real-world web applications
  - Built responsive UIs using React.js and Tailwind CSS
  - Integrated backend APIs to display dynamic data
  - Worked with React.js and React Native (Expo) in practical projects
- 

## Education

Lincoln College of Science, Management & Technology 2023– 2025

- Specialized in **Front-end Mobile App Development**
  - Technologies learned: **React Native (Expo), React.js, Tailwind CSS**
- 

## Work Experience:

### Mobile App Developer – Spicodex

Dec 2024 – Feb 2025

- Developed mobile application features using React Native (Expo)
  - Worked on UI implementation and API integration
  - Collaborated with development team to improve app performance and user experience
- 

## Projects

### Gethadi – AI Personal Automation Platform (Mobile + Web)

Built a cross-platform AI automation system designed to help users automate tasks and interact with AI across mobile and web.

- Developed a mobile application for AI-powered task automation and productivity
- Built a companion web version for extended access and management of automation workflows

- Designed conversational AI interface for user interaction and task execution
- Implemented backend services to handle automation requests and AI responses
- Focused on seamless experience across mobile and web platforms
- Built responsive UI for both mobile (React Native) and web (React.js)

**Tech Stack:** React Native (Expo), React.js, Node.js, APIs

 Mobile/Web: <https://gethadi.com>

## Backly – Visual Backend Builder (Full-Stack SaaS)

Built a full-stack backend generation platform that allows developers to visually design and manage backend systems.

- Designed and developed a visual backend builder for creating APIs, databases, and authentication flows
- Implemented dynamic database modeling and schema generation
- Built REST API generation system from user-defined models
- Integrated authentication and user management flows
- Developed responsive and interactive UI using React.js
- Built backend services using Node.js and Express
- Focused on scalable architecture and modular system design

**Tech Stack:** React.js, Node.js, Express, PostgreSQL, Tailwind CSS

## E-commerce Front-End Website

- Developed a fully responsive e-commerce UI with React.js and Tailwind CSS
- Designed and implemented features such as product listings, shopping cart functionality, and order management systems.
- Focused on creating a responsive, user-friendly interface for an optimal shopping experience.

## Student Finance App

- Developed a cross-platform mobile app using **React Native (Expo)** that allows college students to view and pay all their fees in one place
  - Designed an intuitive, user-friendly interface for fee breakdowns, payment history, and real-time payment confirmation
  - Focused on **mobile responsiveness**, smooth navigation, and clear UI/UX for students
  - Integrated essential features like secure payment flow and notifications using React Native components and Tailwind-like styling
-

## Technical Skills

- **Languages:** JavaScript (ES6+), HTML5, CSS3
- **Frontend:** React.js, React Native (Expo), Redux
- **Backend:** Node.js, Express.js
- **Databases:** PostgreSQL (add if you've used it — if not, we should fix that gap)
- **Styling:** Tailwind CSS, Bootstrap, Styled Components
- **Tools & Platforms:** Git, GitHub, VS Code, REST APIs
- **Deployment & Cloud:** Vercel, Netlify, Firebase
- **Core Skills:** Responsive Design, Component-Based Architecture, UI Optimization, API Integration

---

## Language Skills

- English: Very Good
